Sourcing Intermediates from SBI

SBI Fine Chemicals Inc. synthesizes optically pure pyrrolidinol, aminopyrrolidine and proline starting materials via continuous flow technology, allowing medium scale production of these useful chiral compounds. We regularly stock enough material for orders from 100 g to 1 kg, and can fulfill orders of up to 100 kg promptly.

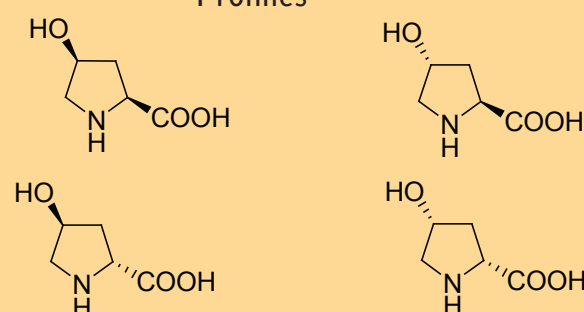

Aminopyrrolidines

Pyrrolidinols

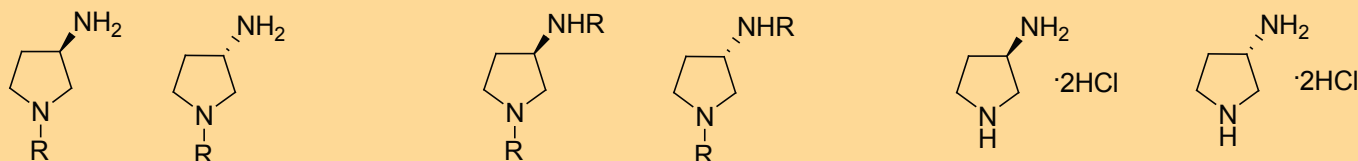

Prolines

Chiral Derivatives

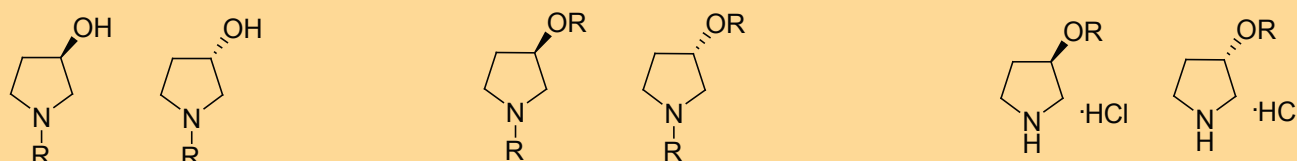

Upon request, a variety of chiral derivatives of the aforementioned stock compounds can be prepared in a 100 g to 100 kg batch. Examples where a process has been established are shown below:

Aminopyrrolidines

R = Protecting groups

Pyrrolidinols
